Curriculum Supplement Enhances Learning for Kids Gravitas Publications Introduces Kogs-4-Kids™ Real Science-4-Kids Series

Albuquerque, NM – Rebecca Keller, PhD, CEO of Gravitas Publications, Inc. confirmed the release of Kogs-4-Kids, a workbook supplement to Real Science-4-Kids Series (RS4K).

The innovative program module, available now for Chemistry Level I, grades 4 – 6, contains the current RS4K Chemistry Level I textbook, the student workbook and teacher’s manual, plus six KOGS workbooks that connect Level I Chemistry to 1) language, 2) history, 3) philosophy, 4) technology, 5) the arts, and 6) critical thinking.

“Our interdisciplinary curriculum promotes deeper understanding of scientific information so that children learn essential concepts well rather than simply memorizing a random collection of facts,” commented Dr. Keller. “Learning occurs in stages that requires both repetition and depth. RS4K along with Kogs-4-Kids™ promotes a sequence of necessary learning steps that will help students achieve scientific literacy.”

For more information on Kogs-4-Kids, see www.gravitaspublications.com.
